

# Makeovers Big and Small

**By: Lynn Miller**  
Owner

The term "makeover" sometimes makes you think about drastic changes. Sometimes a makeover is a drastic change, but sometimes it's making a series of small changes to make you look your best. A wise stylist will take several factors into consideration before doing a makeover. What is your face shape? The cut should complement your face and not draw attention to an unusual shape. The style has to be something YOU can live with every day. You're the one who'll be working with your haircut each morning, not your salon professional.

Your hair color must complement your skin tone. You may think you want to go red, but which red should you wear? Based on your skin tone, should you wear a cool red or a warm red? A skilled salon professional will evaluate your skin tone and eye color before she chooses the right tone for you. Often times, when you actually see the hair swatch next to your skin, you may not want what you thought you wanted.

Then there is the magic makeup. Foundation, concealer, pencils, shadows, mascara, lip liners, lipstick and so much more to choose from. What is the right combination and how do you know which way to go? It all starts with a thorough consultation with a skilled makeup artist who will ask you about your lifestyle,

schedule and what you'd like to achieve. It really is all about the expectations. Communicate to your makeup artist what your expectations are. Are you looking for the "soccer mom" look or the "special occasion elegant" look?

Salon De Christé has over 50 highly trained hair stylists and make up artists who have done thousands of makeovers. From proms and weddings to that special night out, these salon professionals know how to make it a special event. We love seeing a transformation take place at the salon. We see the outer self being changed, but we also see women gain confidence and self-esteem after their makeovers.
